

**KASK's CLASS SHINE – *Reaching Beyond Perfection***

The idea of cap and visor integrated system was born with CLASS, which up until last year has met several approvals and appreciations from large part of keen skiers.

It is not needed to be ski expertise to understand that KASK's idea is really innovative and the designed visor replaces entirely the ski goggles by increasing skier comfort and sight field.

And CLASS has been its first expression and the first mouthpiece of the technology and care of the details which nowadays mark all the 2010/11 winter collection.

The leatherette auricles in the new product give a hide effect together with the other helmet features, that is chinstrap and the neck protector.

The available colours are white/grey, anthracite/black and gold/black silver with metalized paint tripod on the entire range and mirror visor.

To optimize precision a single size system has been introduced so that any helmet can be adjusted to reach personal fit for any skier in a range of 11 different sizes, from 51 to 62.
